

# Process Imaging Enhancement(PiE)

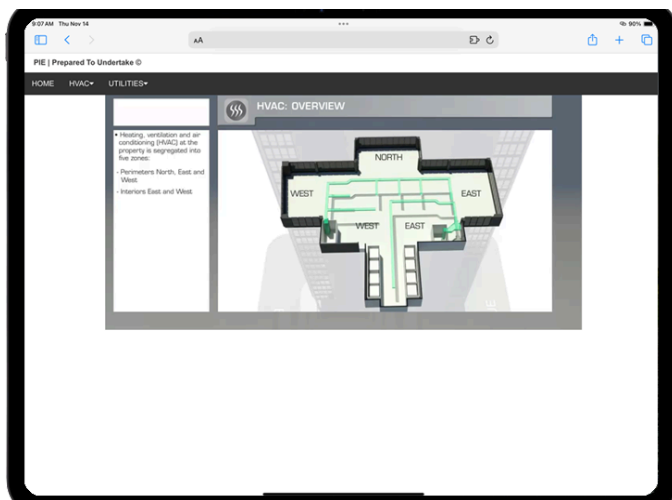

17364 Upland Ave  
Fontana, CA 92335

## P.T.U Brochure

November, 2024

### Product Overview

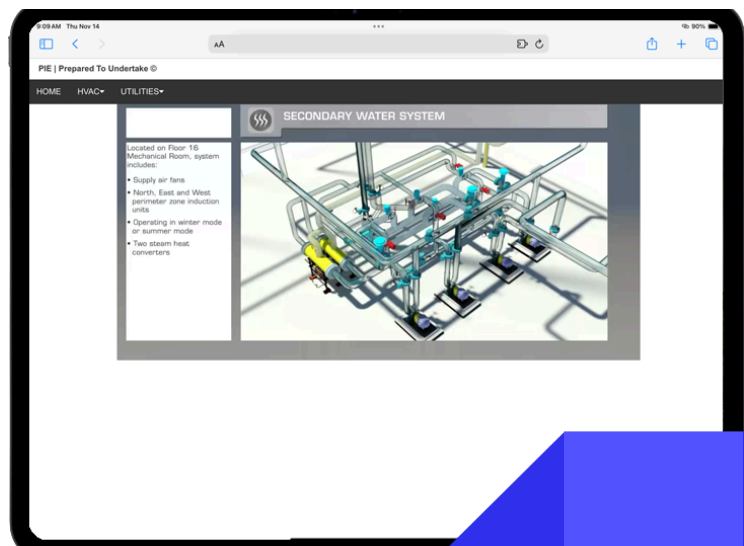

**Prepared To Undertake(PTU)** is one of a kind training tool that provides equipment specific training for engineering and maintenance personnel. The content is fully customizable to the property needs.

### Highlights

P.T.U's engaging 3d visuals provide clear and concise information that prepares technicians to undertake equipment troubleshooting, failures and repairs.

Minimizing process downtime in a **pharmaceutical environment, food and beverage, hospitals, oil refineries, energy plants, warehouses, commercial buildings** and more is possible with PIE's P.T.U web-app.

## Access

**P.T.U** was developed for any smart device capable of running popular web browsers such as **Chrome, Firefox** and **Microsoft Edge** or **PC**. Having access to training information at the tip of your fingers provides the freedom to refresh your equipment insight.

## Application

P.T.U is not limited to a specific industry or equipment specific. This application can support GMP equipment, utilities equipment, HVAC equipment and any infrastructure equipment in the commercial sector and private sector.

State of the art process equipment demands well trained individuals in order to maintain operations running effectively. P.T.U bridges the gap from static off the shelf training to property equipment specific training material.

We will be blessed to schedule a demo via zoom or in person at your convenience.
